1. Please click the following link to access the Town of Salisbury Geographic Information Systems (GIS) website [Salisbury, CT GIS (mapxpress.net)](#).

"A geographic information system (GIS) is a system that creates, manages, analyzes, and maps all types of data. GIS connects data to a map, integrating location data (where things are) with all types of descriptive information (what things are like there). This provides a foundation for mapping and analysis that is used in science and almost every industry. GIS helps users understand patterns, relationships, and geographic context." (ESRI, 2022).

In Salisbury, our GIS system is based on the Assessor's database including parcel lines and ownership information.

4. Once in the viewer, select layers from the dropdown menus on the upper right to view additional information. The current underlying zoning information, effective October 17, 2022 is now available. Note that, Assessor records may not match (See step 5).

5. Select a parcel to see specific details such as address, owner, map/lot, and acreage. In the example below, the Assessor's information does not match. The correct zoning on this piece is R-20.
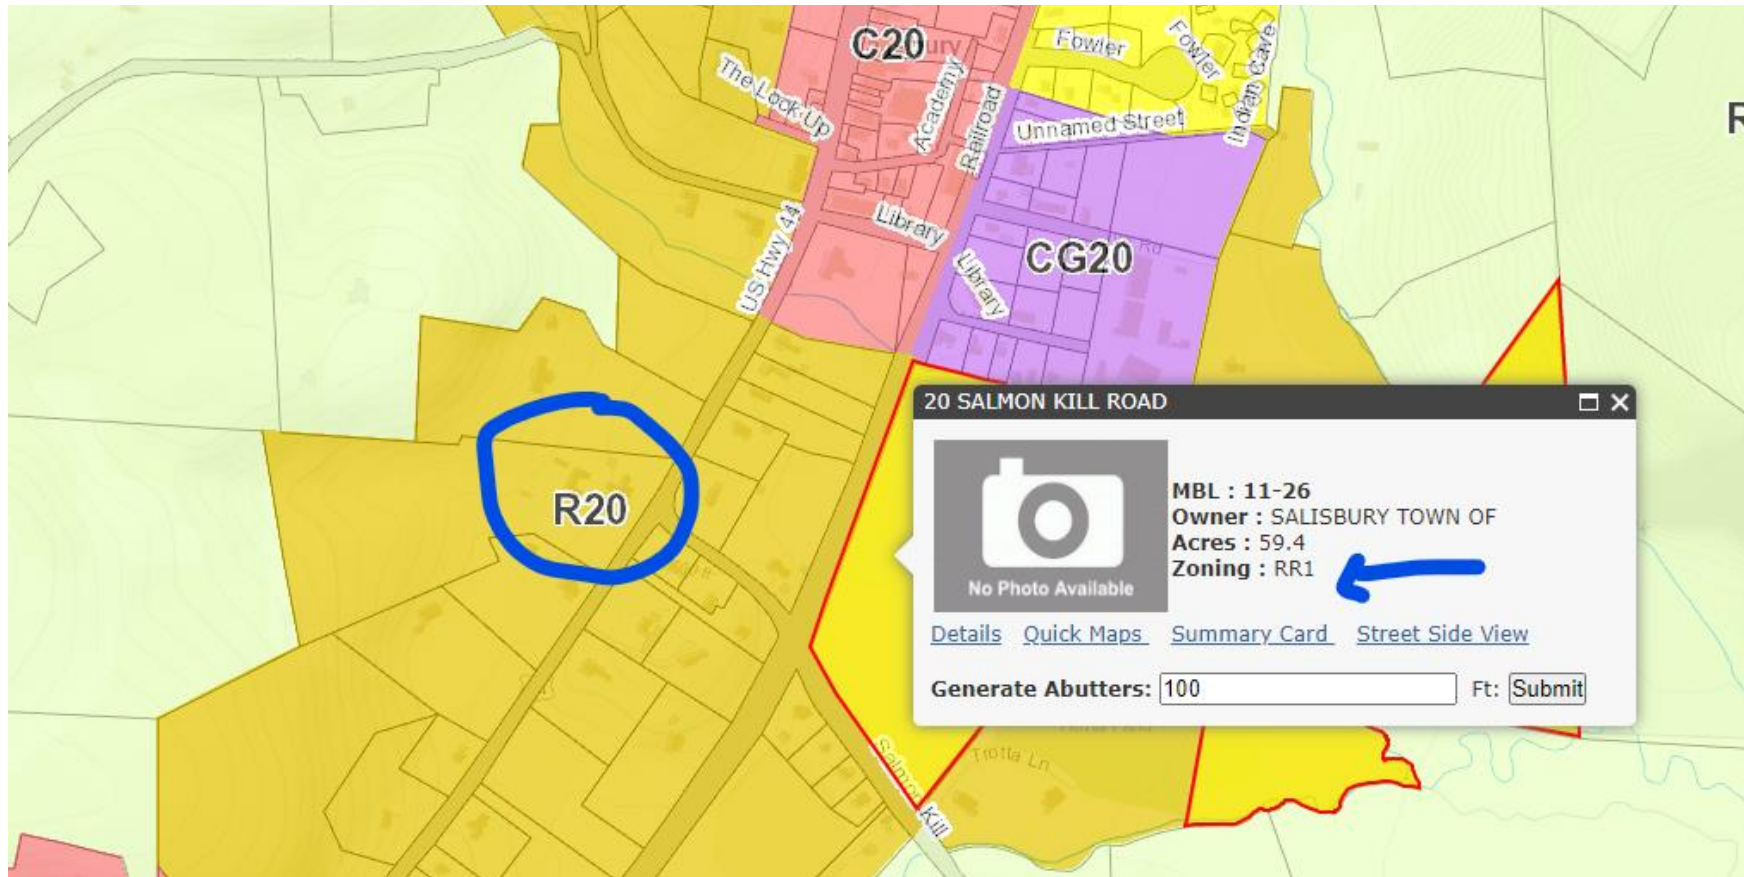

Making the zoning layer available through the GIS is the first of several steps towards making Land Use resources remotely accessible and more user friendly. This is a work in progress that requires collaboration with several departments and commissions. Periodic updates will be forthcoming.
