

Lakeville Village Planning Study
Public Engagement Program
at The Town Grove
March 18th - 10 AM to 12 noon

The Salisbury Planning and Zoning Commission (PZC) and Colliers Engineering & Design (CED) invite public input to shape and refine the ongoing Lakeville Village Planning Study focused on:

1. Pedestrian and bicycle access, circulation, and safety
2. Public greenspaces
3. Traffic circulation and safety
4. Parking
5. Stormwater management

In fall 2022, the PZC retained CED to study the center of Lakeville to provide short-and long-term strategies to address issues of concern identified by the community. Over the past four months the CED team has visited Lakeville repeatedly and reviewed prior studies and plans of the study area. They convened focus groups gathering information about Lakeville, its history and evolution, access and utilization of village businesses, services and amenities, and which locations may benefit from enhancements. These focus groups offered first-hand, in-depth information and perspectives related to circulation and parking, connectivity, open space and recreation, historic and cultural resources, economic development, land use, housing options, infrastructure, and utilities.

Before developing and refining the study recommendations, the PZC and CED welcome residents and visitors to a public engagement program on March 18th, to provide input on the study. We strive to engage and learn from the broadest cross section of the community possible.

The **Public Engagement Program on March 18th will run from 10:00 am to 12:00 pm at The Town Grove**. There will be a brief kick-off presentation to explain the study, followed by smaller break-out sessions where attendees can provide input on specific topics. This is a participatory event – we encourage all ages to attend. Light refreshments will be provided.

For those unable to attend, there will be information posted on the Town website as well as a response form. The information and form will be uploaded to <http://www.salisburyct.us> prior to the program. We encourage and welcome suggestions and comments until April 1st.
