T0: Salisbury Inland Wetlands and Watercourses Commission

In RE: Permit for regulated activity 14 Red Mountain Road

Dear Chair Burcroff and members of the IWWC: At the request of Commissioner Sally Spillane please find a schematic of the type of stream crossing proposed. The dimensions are from a design manual, so the scale and measurements are not relevant to this project but it should provide a visual illustration of what is proposed. For the record, the specifications for this specific crossing are: two 30 inch culverts and compacted rip rap stone to prevent erosion as shown on the schematic. The driveway proposed is 12 feet wide with 12 inches of base material and 4 inches of top dress material. I trust that this information will adequately document what is planned.

Michael W. Klemens
