To the Salisbury Inland Wetlands and Watercourses Commission,

We are residents and property owners in Salisbury who look after our land under management objectives that include sustainable forestry, wetlands protection, pollinator habitat and preservation of cold-water stream ecology. Portions of our land are under permanent conservation easements to both the State of Connecticut DEEP and The Nature Conservancy. We often work in partnership with state and federal programs to provide guidance for these activities.

We support the proposed amendments to the IWWC regulations and are thankful for your commission's vision and hard work to balance the rights of property owners while also providing exceptional protection strategies to safeguard Salisbury's very unique and increasingly rare biodiversity.

Thank you,

Curtis and Susan Rand
