Dear Dr. Klemens,

Thank you for your email this morning.

I believe Logan and Brooks can each summarize their reports in no more than 15 minutes this evening and then will be available to answer questions.

Sincerely,

Perley Grimes

Subject: Logan and Brooks

Good Morning Attorney Grimes:

We have received letter reports from two of the Crugers' retained experts. While you have not formally intervened, I want to afford the Crugers' experts time to present their findings to the PZC, the Applicant, and the public.

I intend to begin the hearing tonight having the Applicant present new information including a brief summary of their photometric report. The PZC will then ask questions of the Applicant.

Before I go to the general public, I would afford the Crugers' experts Logan and Brooks, an opportunity to explain their submissions.

Do you think that they can each summarize their detailed reports within 15 minutes (a total of half an hour) and then be available to answer questions of the PZC and the Applicant immediately afterward.

Please let me know as I am trying to develop an outline for tonight's continued hearing, reserving ample time for the general public to be heard.

Sincerely,

Michael w. Klemens, Chair
Salisbury PZC
