Drifting/tirebsmoke

From Allen Cockerline**Date** Fri 7/10/2026 4:10 PM**To** Miles Todaro

Miles,

Please log this as correspondence for the continuation of the public hearing for lime Rockparks proposed amendment to the zoningregs.

On June 8, 2026 while having dinner in my back yard I got to witness someone smoke their tires on Farnum Rd. It was only a few seconds but the resulting smoke lasted for quite awhile.

Attached are timestamped photos showing the progression over a period of 40 mins or so. At 35 minutes we could smell burning rubber. The wind was calm so it just stayed and stayed. If this is the result of one tire for 5or 6 seconds what would 10 cars for 15 minutes produce.

Allen Cockerline
