To Curtis Rand <crand@salisburyct.us>

Hi, Curtis:

It was pleasure talking with you last week. Just to recap, while we can't fund the move of the building, SHPO very much wants to be involved in the ultimate reuse of the Train Station once it is in its new location.

Once the building is relocated as planned, it will remain listed on the National Register and thus will be eligible for funding from our office. We can fund a number of pre-development studies including:

- A feasibility study with a public charrette component to determine the best use for the building
- Architectural plans and specifications to support an Historic Restoration Fund grant

You can also apply to the HRF program for up to \$200,000 in matching funds to restore and rehab the building to support its reuse.

Best of luck with this project and please keep me posted!

Mary
